# LX-80-15 Level Sensor

RADAR LEVEL SENSOR FOR WATER LEVEL MONITORING

## Highlights

- Contactless water level measurement
- The narrowest beam measurement angle on the market (5°)
- RS-232, RS-485 Modbus, SDI-12, and analog 4-20 mA interfaces in all models
- Remote configuration of all instrument parameters through any digital communication interface
- Robust small size IP68 aluminum or stainless steel enclosure

### Applications

- Water level monitoring for rivers, channels and lakes
- Early flood warning
- Water reservoir monitoring and irrigation control
- Observing the level of various fluids in the chemical industry
- Level tracking of various fluids and solids in the food industry
- Monitoring levels in waste water, industrial applications, and tanks

### **Product Description**

Geolux LX-80 series of instruments are advanced contactless radar level meters designed for precise distance measurement from the instrument to the surface of the various fluids. This functionality is achieved by transmitting an electromagnetic wave in 80 GHz frequency range (W band), and measuring the frequency shift of the electromagnetic wave reflected from the water surface. Instruments are characterised by low power consumption, supported by multiple communication interfaces, compatible with Geolux and third-party dataloggers, and support remote configuration of all instrument settings over any available digital communication interface.

Narrow beam width of only 5° allows for simpler installation, and that nearby structures such as bridge railings or pillars do not interfere with the accuracy of the water level measurement.

## **Detailed Specifications**

Model Name	LX-80-15 1sps
Radar Type	W-band 77-81 GHz FMCW radar
Beam Angle	5°
Detection Distance	15 m
Blind Zone	0.2 m
Resolution	0.5 mm
Accuracy	± 2 mm
Sampling Frequency	1 sps / 10 sps optional / 20 sps optional
IP Rating	IP68
Serial Interface	1 x serial RS-485 half-duplex
	1 x serial RS-232 (two wire interface)
Serial Baud Rate	1 x serial RS-232 (two wire interface) 9600 bps to 115200 bps
Serial Baud Rate	9600 bps to 115200 bps
Serial Baud Rate Serial Protocols	9600 bps to 115200 bps Modbus, GLX-NMEA
Serial Baud Rate Serial Protocols Analog Interface	9600 bps to 115200 bps Modbus, GLX-NMEA 4-20 mA
Serial Baud Rate Serial Protocols Analog Interface Other Interfaces	9600 bps to 115200 bps Modbus, GLX-NMEA 4-20 mA SDI-12
Serial Baud Rate Serial Protocols Analog Interface Other Interfaces Connector	9600 bps to 115200 bps Modbus, GLX-NMEA 4-20 mA SDI-12 M12 circular 12-pin
Serial Baud Rate Serial Protocols Analog Interface Other Interfaces Connector Input Voltage	9600 bps to 115200 bps Modbus, GLX-NMEA 4-20 mA SDI-12 M12 circular 12-pin 9 to 27 VDC 0.36 W standby 0.15 W; sleep 0.03 W;
Serial Baud Rate Serial Protocols Analog Interface Other Interfaces Connector Input Voltage Power Consumption	9600 bps to 115200 bps Modbus, GLX-NMEA 4-20 mA SDI-12 M12 circular 12-pin 9 to 27 VDC 0.36 W standby 0.15 W; sleep 0.03 W; extended 0.6 W

#### FCC & CE **APPROVED**
